NUMONICS BREAKTHROUGH

The Cordless Manager Mouse turns all other mice into dinosaurs. Designed for IBM PC, PS/2, and compatibles, with Microsoft, Logitech, and MSC compatibility, its breakthrough infrared technology gives you cordless freedom and accurate, reliable performance with a lifetime warranty. For desktop publishing, CAD/CAM, and all your graphics applications, the Cordless Manager Mouse soars onto the scene like nothing you've seen before.

NEW TOP FLIGHT DESIGN

Completely re-invented inside and out, the Manager Mouse, corded and cordless, offers dynamic tracking, 10-1000 dpi, and a sleeker, hand-friendly profile that looks as new as it is. With the new design, there's no cleaning required, no mouse pad required, and, because it's Numonics, no worry required. Even the price is right.

THE NUMONICS IDEA

Numonics has developed and sustained an international reputation in computer peripherals. The reputation was developed through our innovations, our technological breakthroughs, and it's been sustained by reliability. We make our products ourselves in Pennsylvania, under our constant watchful eye. We test them. And test them. And test them. Then, after they're sold, we support them. It's true Numonics has flights of electronic imagination that dazzle, like the Manager Mouse. We also understand the importance of a product that keeps on performing, day after working day, and the reassurance of a product with a lifetime warranty, like the Manager Mouse.
